

Dear Family,

We here at DLEACS we have good thoughts for your safe and pleasant time away from school. Congratulations to your student for successfully passing the 4th grade. I am looking forward to taking your student to the next level in their pursuit of excellence in Grade 5 math.

With this in mind, it is important that in order to keep your student sharp and ready for the challenges that wait, I have attached a math packet that will help your student maintain their level and possibly enhance their knowledge in preparation for my math class.

One of the things I will require in my class is for the students to show their work. This will enable me to follow their thought process and better help me to find their weaknesses as well as their strengths. As they become stronger in their ability to explain their work (using mathematical terminology) they will become stronger in their ability to do the work. Also, we will be working with multiplication facts up to and including the 12 times tables. Please work with them to sharpen these skills.

We, at DLEACS, thank you for all that you do to aid and assist your student throughout the year and ask that you will continue to encourage them as much during the summer to keep their skills sharp.

Dr. Lena Edwards Academic Charter School
School Supply List 2019-2020
Ms. Reid and Mr. Bryd
